Untying intim, they took off his clothing, laid him down upon a log, lashed him firally to it, and with large hickory switches commenced iscersting him. Four let in on him at once, and their number soon increased to six. They continued to beat him there for a long time, paneling occasionally and asking him if he would confess, and upon his refusing would let in on him more vigorously. The blood tricking from his back in streams. His citious appeals in behalf of mercy were totally disregarded. Nature finally yielded and the poor man swooned and was lost to consciousness for several minutes. As soon as he revived these hellish tormentors resumed their tortunes. They split the ends of green sticks, and twisting them in his hair, and publing violently caused the most exercisating pain. The and other finallish operations were continued for some time. They had also his carb his faggers at the knost exercisations were continued for some time. They had also his carb his faggers at the knost. After this operation the wretebood victim minited, and failing to recover for several minutes, the mareferes prenounced him had and be an another earth. They now tied a rope around his meek, and hung him to a limb near by and instantly decamped, leaving him suspended between the heavens and the earth.

The third shy afterwards the hody was discovered, taken down and decently interred by friends.

In this connection I might add that I have heard a gentleman conversant with European stairs, broach a theory respecting the alleged fresh attempts of Lone Napoleon to obtains a recognition, by the great maritime powers of Europe, of the Southers Confederacy. It is as follows: Napoleon, it is well known, has a gigantic job on his hands, in the shape of his Mexican scheme. At the same time there is looming up in Europe a war, which, if allowed to progress unchecked, must involve nearly all Europe. France cannot safely embark in such a war, without obtaining some guarantee for the safety of Mexico against assault. The United States is the greener from which this assault is exposited. France at war in Europe, and with all her forces engaged there, would fuse leave her open to attack on the part of the power which controls the sca. We could cut here here here open to attack on the part of the power which controls the sca. We could cut be two her open to attack on the part of the power which controls the sca. We could cut be robe her by the previous of fram the mother country, isolate Mexico, and even without going to war, allow privateers to be fitted out in our ports, (as France has allowed those, of the robes) to prev upon Freight commerce, and thus cripple her resources and out down her revenue. To prevent such a possibility it is necessary for fire to raise up a barrier to us, and what better plan than to put the rebels first under obligations to her for her recognition, and next to use the Confederacy as an ally in case of war, arising east of any degredations of privateers from our ports, or found other course.
